Dear Mr. McVey:

This office has recently received the above referenced building permit application; however, we are unable to approve the permit at this time. According to the plan that accompanied the permit application, the proposed addition appears to be less than the minimum distance of ten (10) feet from the septic tank.

In order for this office to approve the permit application, this problem needs to be resolved. To resolve this issue, either the proposal needs to be revised or you need to show that the proposed addition meets the minimum separation distance to the septic tank by staking the corners of the proposed addition.

Thank you in advance for your time and attention. If you have any questions or concerns, please call this office at (410) 313-2640.

Sincerely,
